

**AUTORITATEA
PENTRU
DIGITALIZAREA
ROMÂNIEI**

The Authority for the Digitalization of Romania (ADR) is directly coordinated by the Prime Minister.

Its main objective is coordinating the implementation of public strategies and policies in the fields of digital transformation and information society.

ADR Vision

Fastest growing digital economy
in the European Union

ADR Core objectives

- Smart government
- Digital transformation of the Romanian economy
- Digital skills for all

Digital transformation of Romanian economy

Increasing
adoption of
digital tools

Stimulating
the start-up
ecosystem

Digital skills

Skilling

Reskilling

Upskilling

ADR priorities for a smart government

Clear and
transparent
regulation

Interoperability

Electronic
identity

Governmental
cloud

The platform is **an online registration system for public institutions that did not have one of their own** - specifically for those that registered documents relating to the unemployment and work-from-home government benefits during the state of emergency

The process of sending the file and receiving the resolution **is 100% electronic.** For standardized documents, the forms can be downloaded from the platform, filled in and signed digitally or by hand, after which they are uploaded individually on the platform.

The information published on these platforms represents the official source of information for the public with regard to the sanitary emergency caused by the COVID-19 pandemic

The platforms were created specifically to:

- **combat the fake-news phenomenon**, which grew exponentially during this COVID-19 crisis;
- be **practical guides**, with rules of interaction, action and behavior recommended during the emergency generated by the COVID-19 pandemic;
- **make the COVID-19 infection data accessible**, placing it in an easy-to-use graphical form;
- **support the Romanian citizens** and the associations and civil society groups from abroad.
